Part 1 – Project and Sponsor Information				
Name of Action or Project: "S16A" Proposed Snowmobile Trail				
Project Location (describe, and attach a location map): Town of Cherry Creek, NY. Currently a secondary trail of the Boutwell Hill State Forest.				
Brief Description of Proposed Action: The proposed trail will connect the DEC's Boutwell Hill Parking Area to Cockaigne Ski Resort and provide users access to state-funded trails S16 and C1. The Boutwell Hill Parking Area has an existing trail that the Cherry Creek Sno-Goers maintain in order to connect to C1. The proposed trail will provide direct access to the entire trail system, and increase winter tourism in the region. The trail would require some brushing and widening, but no major construction since it was a trail that was used for snowmobiling many years ago, and is currently classified as a "secondary trail" with the DEC. The trail is 5.7 miles long, and will be around 12' wide, resulting in 8.29 Acres of land being disturbed for this project.

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered “moderate to large impact may occur”, or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
