INTRODUCTION TO BOOK TWO

A treasure of genealogical information was found in The Archives of the Chautauqua County Home . Several original hand-written ledgers were made available so that these records could be put into a data base to be shared with other genealogical researchers. We gratefully acknowledge the cooperation of the Administration of the Home and Carol Portman, Director of Medical Records, who assisted us in this project.

Book One of this work was extracted by Virginia Barden from three of those earliest ledgers covering the years from 1832 to 1867. Book Two is a compilation and consolidation of information from eight ledgers with information from 1867 to 1918.

Part I of this Book Two was extracted from a single ledger captioned "Record of Chautauqua County Almshouse and Asylum 1867-1885." The records therein were a chronological list of events giving surname, given name, age, town charged, date, length of stay. We have alphabetized and organized these in columns to facilitate research. In the column headed "comments," we have listed any other information given in the ledger under the listing of that person. Death dates have been listed in the right hand column. Most of the information in this ledger fit into a one-line format. In a very few cases, there were more extensive notes and these have been included in Part V of this book.

Part II was extracted from three ledgers. Two of these contained similar, but not identical information on admissions, discharges etc. of residents of the Chautauqua County Alms House 1885-1918. The third was a separate record of the Asylum for those same dates. These records, originally in chronological order, have been changed to an alphabetic one-line format.

Part III contains information from the published *Proceedings of the Board of Supervisors* and a listing of indentures.

Part IV was extracted from two journals kept by a resident/employee of the home, Martin T. Spellacy. This section is transcribed just as written and is indexed along with Part V.

Part V is a transcription of notes from six ledgers which are described at the introduction of each. These contain many names and much personal information for the genealogist. This is followed by an every-name index to Parts IV and V.

We are aware of contradiction of information. We have valiantly worked to transcribe information just as it was recorded in the various ledgers. The handwriting was difficult to read, but we did the very best we could. We do not interpret the information for the researcher or explain different spellings, different ages, identification of persons with similar names, etc. We offer this work to genealogical researchers in hopes they may find missing ancestors and a better understanding of the lives they led.

This book would not exist except for the patience and computer skills of my husband, Norwood J. Barris. He not only produced the county map locating the Poor House, but did the other artwork, page layout, type-setting and uncounted hours of editing.

Part One

Record of Chautauqua County Alms House & Asylum 1867-1885

This section was extracted from a single ledger captioned "Record of Chautauqua County Almshouse and Asylum 1867-1885." The records therein were a chronological list of events giving surname, given name, age, town charged, date, length of stay. We have alphabetized and organized these in columns to facilitate research. In the column headed "comments," we have listed any other information given in the ledger under the listing of that person. Death dates have been listed in the right hand column.

Most of the information in this ledger fit into a one-line format. In a very few cases, there were more extensive notes and these have been included in Part Four of this book.

A separate ledger contained a few case histories of persons named in this section. These are also found in Part Four and the researcher should check the index following Part Four for names.

To fit the one-line format, the events are abbreviated:

- abs = absconded
- adm = admitted
- bir = born
- die = died
- dis = discharged
- fnd = found
- ret = returned

Part Two

Record of Chautauqua County Alms House & Asylum 1885 to 1918

This record is a compilation extracted from three ledgers found in the Archives at The Chautauqua County Home and Infirmary. One was a statistical record of admissions from April 1, 1885 to October 1, 1905. The second was a similar statistical record arranged according to towns, with emphasis as to which governing body (town or county) was to be charged for that resident. A third ledger was kept for admissions etc. to the County Asylum for the same time period. These records were separately extracted into three data bases, then merged to give as much information as possible about the individual. In some cases, information was conflicting or there were many transactions for one individual. Every record that contained information of interest to the genealogist was left in, while duplicate and/or extraneous material was deleted.

Each ledger was kept chronologically, but all information was printed here in alphabetic order. The columns L to R give surname, first and middle, date of admission, political unit charged, discharge date and comments. The extreme right hand column lists death date and the column to the left of the death date a stone number if that person was buried in the County Farm Cemetery. If there is a note the person was buried on the farm, but no stone number given, the number 000 appears in this column. Also, if there was no burial note, the number 000 appears.

Please remember that the persons producing these original records had many other tasks to perform and were not well-trained in bookkeeping. They were dealing with the ill and indigent and the careful spelling of the name or getting accurate age was obviously not the top priority at the time of admission. When searching for a family name, the researcher should use every creative alternative for a possible spelling. We have taken the liberty of converting a few like "Maloany" to Maloney, but in most cases have kept the spelling as best we could interpret the handwriting.

The back pages of the second ledger was used to record deaths since October 1, 1911. This was compiled about 1918 giving name, town, age at death, date of death and in many cases, place of burial. If a bit of information was found only on this list, it is included and marked with an asterisk (*).

Part III

Personal information about residents of the Chautauqua County House have been published from the beginnings of the institution. Each year, the Superintendent of the Poor delivered a "Report of the Superintendent" to the annual meeting of the County Board of Supervisors. These were included with other reports in an annual publication called *The Proceedings of the Board of Supervisors*. A full collection of these Proceedings can be found at Reed Library on the campus of New York State University College at Fredonia.

In some years, these Reports were very limited, noting only the number of residents, admissions, discharges, deaths etc. in each institution (Alms House and/or Asylum). Other years the reports may list names but no details. In some, much detail is included. A thorough study of these reports can often result in learning the names of men paying expenses for "bastard children" cared for by the county.

When we first contemplated this book, we had only 3 ledgers and thought the years 1867-1887 were missing. We therefore went to the Superintendent's Reports to fill in our missing data and to give the researcher an idea of the information available in already published material. One advantage of these reports is the listing in many cases of the cause of death, information not found in the ledgers used in the main part of this book. It will also point out again the problem of conflicting information. No attempt is made to account for these conflicts, the information available has been transcribed here to the best of our ability. We leave interpretation to the researcher.

The "missing" ledgers were later located and transcribed as part one of this book. We offer in Part III the data gleaned from the *Reports* for those years.

Also included in Part III (pages 137-144) is a transcription of County Home Ledger number 6 which recorded indentures of children from 1832 to 1890.

Indentured Children

One small journal from the Archives of The Chautauqua County Home was a list of children from the nineteenth century Alms House indentured into private homes.

The Superintendent's Report for 1882 claimed, "We make this feature of our work—the placing of pauper children in families, a specialty. We believe that a system that has for its aim the prevention of pauperism and its end the saving of the children of the poor from pauperism and consequent degradation, and placing them in positions where they may become men and women in the best sense of the term, educated, useful and respectable members of society, equal or better than the system that seems to have for its end and aim the present relief only of those asking for aid.....We urge upon parents receiving aid the propriety of allowing their children to be placed in more comfortable and favorable circumstances, and shall continue to do so in the future....."

In 1842, we find this note in the Proceedings of the Board of Supervisors:
Resolved that whenever any person takes a child on trial, the keeper shall require such person (if such child is returned) to return it as well clothed as when taken away.

On 12 Oct 1854, The Superintendent of the poor reported to the County Board of Supervisors:

. . . .during the past year there has been a great increase of immigrant population. Since the date of the last annual report, 1262 foreigners have received aid and comfort at the hands of the Poor Officers of the county whose names we have reported to the Commisioners of Immigration. Many of those were paupers in Europe before coming to our shores.

On the 25th November last the ship Michael Angelo arrived in New York and within twelve days thereafter 67 of her passengers were at the commencement of winter without money, means, or friends thrown upon our county for relief.....many of them had to be sent to your Poor House for a winter support and some of them remain there still. For others we have obtained employment where they are supporting themselves and several of their children have been bound out to good places. . . .

In Chaut Co Hist Soc there is (1991) a hand-written document dated Ellington Sept 8, 1838, & directed to the Supts of the Poor in Chaut Co:

"Sirs, this certifies that we are acquainted with George H Altenburg and a boy said to be bound to him by you, and we further state that the Boy is not well-used and think it not a suitable place for the Boy to stay and wish you to attend to it immediately Signed Lorenzo XXX Jr, Robert Barclay. David Watson. Sworn before me this 8 day of Sept 1838, George Anderson, J P"

"The Boy" was Alamonson Chafin, son of Freelove Bellows, which see record in Part I, Book One.

The original ledger listed the indentures in chronological order. Here the information is in duplicate, one list alphabetized by the surnames of the children indentured and the second alphabetized by surnames of those to whom they were indentured.

Part Four

Martin T. Spellacy's Journals

Part IV was extracted from two journals kept by a resident/employee of the home, Martin T. Spellacy, from 1902 until 1924. Since we originally decided to end our record at 1918, we concluded the transcription of "Martin's Journal" at Jan 1st, 1918. This section is transcribed just as written and all names are included in the every-name index that begins on page 269.

On the flyleaf of the first journal is written, "April 1st, 1901, M. T. Spellacy, Brocton, Chaut Co N. York." On the second, "Martin T. Spellacy, Dewittville N. Y. Jan 1st, 1912."

Martin Spellacy was admitted to the Poor House from the Town of Portland Dec 15, 1887 and discharged March 12, 1896. His name was found on several lists in the Superintendent's Reports published in *Proceedings of Board of Supervisors* as a resident, but his name does not appear in any later records in the Archive's ledgers. His name also appears on the audit list as a paid employee from 1902 until October of 1924. The 1920 Federal Census enumerated Martin T. Spellacy in the household of the Superintendent, single, age 63, employed as "engineer on County Farm."

PART FIVE

Notes on Personal History of Some Residents of Chautauqua County Home and Asylum 1867-1918

This section contains bits of personal information about residents of the Chautauqua County House that may yield important clues for genealogical research. This information came from various ledgers found in the Archives of the Chautauqua County Home. Each source is described at the beginning of the record extracted from that journal. No attempt was made to interpret or pass judgment on the information found. In each case we tried to record the entry as written. An every name index to Parts IV and V begins on page 269.

On the reverse of this page is a sample of the form used to take patient history at the County Home and Asylum. A limited number of these histories were found in two ledgers and are the basis of most of these notes.

Several common words are abbreviated in this section. Most should be recognized by the researcher. The most used of these are s-s for self-supporting, and occ for occupation.

VI Information extracted from case histories of inmates of the County Home in 1900 and those admitted to January 9, 1918. A sample form is shown on page 174. Many blanks were left unfilled. The notation for education was either, "common school," or "can read & write." Emphasis seemed to be on whether family had a history of receiving "relief," and the notation s-s = self-supporting.
